

November 19, 2014

The Honorable Harry Reid
Majority Leader
United States Senate
Washington, DC 20510

The Honorable Mitch McConnell
Minority Leader
United States Senate
Washington, DC 20510

The Honorable John Boehner
Speaker
U.S. House of Representatives
Washington, DC 20515

The Honorable Nancy Pelosi
Minority Leader
U.S. House of Representatives
Washington, DC 20515

Dear Senator Reid, Senator McConnell, Speaker Boehner, and Representative Pelosi:

As companies, organizations, and advocates who support clean and alternative energy technology and energy efficiency provisions in the Expiring Provisions Improvement Reform and Efficiency (EXPIRE) Act, we urge you to pass this legislation this year.

Businesses and investors need stable, predictable federal tax policy to create jobs, invest capital, and deploy pollution-reducing energy technologies. Allowing the lapsed clean energy tax provisions to languish undermines investor confidence and jeopardizes continued economic and environmental benefits. These bipartisan tax provisions have a proven track record of helping scale up production and drive down the cost of clean energy technologies, thereby ensuring that market-ready technologies are deployed to their full potential.

The nation's suite of clean and alternative energy technology and energy efficiency tax provisions lower the cost of clean energy and keep the U.S. competitive in the global technology race. They promote economic development, job creation, and a cleaner environment. To continue capturing these benefits it is essential to restore stability in the marketplace by seamlessly extending the provisions in the EXPIRE Act through 2015.

Once again, we urge you to restore the expired clean and alternative energy technology and energy efficiency tax provisions during the post-election work period. Doing so will help build the economy, create jobs, and deliver a safer, healthier future for our children.

We appreciate your consideration and look forward to working with you on this important matter.

Sincerely,
