Rendell touts hydropower during York visit

York Dispatch, October 14, 2009

“Job growth at the local Voith Siemens Hydro Power Generation plant is just one example of the industry's economic potential in the United States, Gov. Ed Rendell said during a visit to the complex on Tuesday.

Rendell stopped at the West Manchester Township manufacturing plant to highlight a new, industry-sponsored study that explores hydropower's job growth and energy production potential in the United States.”

Jobs Coming to Monroe County

Intelligencer Wheeling News-Register, November 3, 2009

HANNIBAL - Forty manufacturing jobs are coming to the former Ormet rolling mill in Monroe County, thanks to York, Pa.-based Voith Hydro.

"We plan to start production at this facility in early 2010," Voith President and Chief Executive Officer Mark Garner said. "We will be hiring local labor for assembly work."

Garner joined Ohio officials, including Gov. Ted Strickland and U.S. Rep. Charlie Wilson, D-Ohio, for the announcement at the site Monday. Garner said his company soon will begin renovating a 32,400-square-foot portion of the former rolling mill, a facility Voith has leased for five years.
