1:00 PM – 2:00 PM  Power Plant Tour of Bonneville Project
Mike Adams, Operations Project Manager for Bonneville Project
Ray Guajardo, Chief of Operations, U.S. Army Corps of Engineers
Greg Webb, Natural Resource Manager, U.S. Army Corps of Engineers

2:00 PM – 4:00 PM  STEM to Hydro Dialogue Workshop with The National Renewable Energy Lab (NREL and the Hydropower Foundation) Complimentary
Are you interested in growing the hydropower workforce in an innovative and virtual way? Join the National Renewable Energy Lab (NREL) and the Hydropower Foundation as they take participants on a journey through the recently launched STEM Hydropower portal. There, participants will be presented with the portal structure and content at a high level. Dialogues will focus on expanding and enriching the portal content and identifying gaps and needs for additional information to foster the linkage between academia and industry. Participants will have the opportunity to provide feedback on its relevance, breadth of information and its ability to disseminate information and attract workers to strengthen the U.S. hydro industry. This workshop is a great opportunity to collaborate with industry and academia and contribute to a tool that is building the hydropower workforce of tomorrow. (Max participants = 25) This will be held on the Microsoft Teams platform. Please visit this link to attend
