

## **Acknowledging the Contributions of Those Involved in Content Development for the Course**

As the hydropower sector continues to advance, the importance of continuing education and professional development for industry professionals has never been greater.

Recognizing this need, the National Hydropower Association (NHA) is proactively responding by establishing the **Hydropower System Principles Course**, a dedicated initiative designed to support hydropower professionals' growth and skill development.

This Course is key to ensuring the hydro workforce remains equipped to address the challenges and innovations shaping the future of hydropower.

Creating such a course is a huge undertaking.

NHA extends our sincere gratitude to the more than 50 individuals who, over the past several months, have worked diligently on development of the content for this new course.

Hats off to the Working Group Participants, Peer Reviewers, and Subject Matter Experts (all listed below), whose invaluable contributions have been instrumental in the development of quality content that will meet the educational needs of the hydropower community.

Their collective knowledge, commitment, and expertise have ensured that the course reflects the highest standards of quality and relevance, aligning with the evolving needs of the hydropower community.

The input of each individual listed below has played a critical role in creating a robust and practical resource for both new and seasoned professionals in the field.

### **Working Group and Peer Reviewers**

Rick Applegate, Tacoma Power  
Mark Benacquisto, United Brotherhood of Carpenters (UBC) Millwrights  
Bruno Benedetti, Brookfield Renewable  
Suzanne Biddle, Tennessee Valley Authority  
Jason Bischell, Tennessee Valley Authority  
Craig Bourassa, Avista Utilities  
Carl Brewster, WEST USA Inc.  
Matt Brooks, Tennessee Valley Authority

Quinn Cosgrove, Tacoma Power  
Katia Debian, GE Vernova  
James Everett, Tennessee Valley Authority  
Ellen Faulkner, Ayres Associates Inc  
Donald Ferko, Ontario Power Generation  
Thomas Fitzgerald, Schnabel Engineering  
Maura Gillin, Chelan County PUD  
Seth Green, Alabama Power Company  
Nuria Holmes, Camas, LLC  
Curt Jawdy, Tennessee Valley Authority  
Scott Klabunde, Hydro Partners  
Scott Korab, Ballard Marine Construction  
Sarah Kulpa, HDR  
Jenna Mandell-Rice, Van Ness Feldman LLP  
Chris Mattson, Tacoma Power  
Elizabeth McCormick, Troutman Pepper Hamilton Sanders LLP  
Ann McManamon, Bonneville Power Administration  
Megan Nesbitt, ANDRITZ Hydro Corp.  
Donald Nims, Colliers Engineering & Design  
Doug Rogers, Tennessee Valley Authority  
Lewis Rounds, Ballard Marine Construction  
Eric Van Deuren, Pacific Gas and Electric Company  
Chris Vick, Bureau of Reclamation  
Heidi Wahto, Stantec  
JK Wang, Pacific Gas and Electric Company  
Briana Weatherly, Portland General Electric  
Sharon White, Rock Creek Energy Group  
Brianna Wilson, Rye Development LLC

### **Subject Matter Experts (SMEs)\***

#### *KGS Group*

Phil Cantarinha, Regional Director, Power and Energy  
Tim "TJ" Ferreira, Senior Process and System Architect  
Adam Pawlikewich, Principal and Director; Head of Hydro Group's Electric Department  
Catherine Percival, Production Planning and Water Management  
Brian Peter, Hydro Project Specialist

#### *BBA*

Kurtis Martin Sturmeay, Asset Analytics Specialist  
Robert Otal, Executive Director, Asset Management & Advisory  
David Tessier, Hydropower Asset Specialist

*Gomez and Sullivan*

Amanda Crandall, Director of Administration and Human Resources

Jerry Gomez, Senior Civil Engineer

Jill Griffiths, Water Resources Engineer

Ian Kiraly, FERC Licensing Manager

Heather Newton, Dam Safety and Structural/Civil Engineering

Betsy O'Malley, Environmental Scientist

Kirk Smith, Vice President and Director of Regulatory and Environmental Services;

Thomas Sullivan, Senior Water Resources Engineer

Tim Sullivan, Vice President of Operations

John Suloway, Senior Energy Regulatory Advisor

*\*NHA contracted with these three NHA member organizations, via a competitive bidding process, to develop the content for the 8 modules of the Course.*
